

PROTECTUS

Introducing ProtectUs

UC Merced's Office of Information Technology is committed to maintaining the safety and security of you and your data while you work, study, research, and grow on our campus. That said, security (especially cybersecurity) is a community effort and OIT cannot do it alone. It depends on us, you, and the entire bobcat community working together to ProtectUs.

ProtectUs is the culmination of all the services, resources, and efforts that are positioned to help protect the campus community. Here you can see the ongoing and new efforts underway as well as the resources you have to secure your information, be proactive, and help minimize the risk to yourself, your fellow bobcats, and to ProtectUs as a community.
