

Principle of 1st Exposure

B. Walvoord, Kaneb Center for Teaching and Learning: University of Notre Dame

- **First exposure:** student first hears/sees new information, concepts, procedures, etc.
- **Process:** student applies, critiques, contrasts, synthesizes, argues, analyzes, etc. This usually results in a product: test, exam, assignment, lab or clinic performance, etc.
- **Response:** teacher, assistant, or peer responds to the product

	Student with Teacher (Class)	Student "Study" Time	Teacher Alone
Traditional Lecture Method	First exposure	process	response
Interactive Method	process, response	first exposure
