<ul style="list-style-type: none"> <li>• <b>Client and Online Version</b></li> <li>• Renewed Annually</li> <li>• 5 copies of Project can be installed per the same user's devices.</li> <li>• For Educational purposes only.</li> <li>• Project 2019 with SW Assurance</li> <li>• Can be used with 7HS-0001</li> </ul>	<ul style="list-style-type: none"> <li>• Online Version only</li> <li>• Renewed Annually</li> <li>• Add on for project team members – limited access to manage assigned tasks.</li> </ul>	<ul style="list-style-type: none"> <li>• Client Version only</li> <li>• Must have Windows installed</li> <li>• Perpetual license</li> <li>• One license covers one PC per person.</li> </ul>
<p>The Project Online Desktop client is included with your Project Online Professional. While you can use it as a standalone client to create and manage your project plans offline, you can also use it to connect to Project Online in your Office 365 environment to work with your Project Online users. For example, you can create, save, and publish your projects to Project Online, and team members assigned to your project tasks can use Project Online to give you updates on their task status.</p>	<ul style="list-style-type: none"> <li>• <b>Manage Tasks:</b> Team member update, assign and add project tasks.</li> <li>• <b>Collaboration:</b> Perfect collaboration environment for team members.</li> <li>• <b>Timesheets:</b> enables team members to view timesheets, enter hours, add or remove tasks from timesheets</li> <li>• Add Issues and Risks</li> <li>• Access Anywhere</li> </ul> <p>Note: Project Online Essentials is not a standalone solution. A PM will need to have Project Online Professional before team members can leverage Project Online Essentials.</p>	<p>Fully installed, up-to-date Project desktop application                      Manage project schedules and cost.</p> <ul style="list-style-type: none"> <li>• Fully installed, up-to-date Project desktop app.</li> <li>• Manage tasks, reports, and business intelligence.</li> </ul>
<p>OIT (Infrastructure) allocates licenses.                      Access and install instructions will be sent to requester.</p>	<p>OIT (Infrastructure) will allocate licenses</p>	<p>The license key will be sent to the requestor and the OIT Service Desk will provide the application for installation.</p>
